

21st January 2011 Bosmartín and beyond

Juan and Penny walking from Bosmartín out towards Alisas. New sites found at

Site 1422 30T 0448762,4796105

3m shaft between boulders at top. Looks choked at base. Undescended.

Site 1785 30T 0448818,4796284

About 6m deep. Drop into small chamber with stones falling further. Definitely the better looking of the two.
