

Notes: Azpiicueta connection area
 A: continues tight and awkward
 B: unsurveyed crawl, worm hole
 C: narrow, fading rift
 D: sandy slope
 E: tubes in roof
 F: 15m rope traverse
 G: hole in floor - connects to passage below?
 H: tubes in roof
 J: tube up and down
 K: hole in floor
 L: squeeze up 2m in rift
 M: choke
 N: Rift pitch about 10m deep. Rocks thrown are heard at pitch P.
 N & P may connect to Hole in the Wall Chamber.
 Northern walls of HiW Chamber needs better survey.

Notes: Floorless Chamber area
 A: c4 - rope in situ (4/8/04)
 B: mud - possible false floor
 C: narrow fossil passage at top of c3
 D: too narrow. Deepest part of PN @ 168m

Site 1471 Torca de Papá Noel
 South Vega VN5089(5)9502(7) Altitude 445m Length included in SVS Depth 277m
 Surveyed 2000 - 2006 to BCRA 5c Drawn by JC after JB, PE, AN, TR
 Easter 2004 notes: CIC Series not drawn in;
 details above Belcher's Slab (Pete Eagan) from 2003
 Connected with Torca de Azpiicueta 3/8/04.
