# EASTER 91

(1)

30/3/91 Sima Andres redescended by ~~Rhys~~  
Pete, Juan, Toby, Jane in its 27th year  
since its first descent by the Spaniards.  
Their survey is OK. Large phreatic chamber/passage at  
bottom.

31/3/91 "TV Mast Cave" <sup>865</sup>~~854~~. Cave which Pete  
dug out. Explored about 400m to head  
of a 20m pitch! and large passage  
below which seems to be at the same  
level as Valline and Cabana. Two teams  
Phil, Pete, Bobby and Toby, Jane, Juan surveyed  
out.

1/4/91 Cueva Del Agua - Lloyd & Bobby Cawthorne  
+ Jennifer Corin. Visited cave so far as end  
of causeway! Water level high, - flowing on both  
sides. Much of last year's flood debris no longer there.

On Monday I went to a  
Cave called agua. I went  
with Bobby and Lloyd. We  
saw lots of water and rocks.

(2)

2/4/91 Torca Andaró  $\equiv$  written up summer 91.

Pete, Phil, Toly

Phil re-rigged entrance pitch. Traverse leads to deviation & descent to head of boulder slope to 2nd pitch. Dwarf ~~and~~ unfriendly traverse & descent to ledge & 3rd pitch. Last exploration went from this ledge over traverse to left. We went right. Pitch ends in self-choked floor. Eye hole on L about 20' up probably connects with bottom of last pitch in old series. (99% certain!)

Possible traverse over our 3rd pitch to what looks like a rift pitch. Needs doing when Phil arrives 'cos those traverses are not nice! Spent the last few months wrapping my legs in Fisons grow bags but I'm still a dwarf - may be next year!

2/4/91 Julie Raby 21yr Canyon

Walk into ent to Colisere

## **MATIENZO CAVES PROJECT**
