

LOGBOOK

Year: 1999

Season: autumn

Logbook pages scanned to jpg then combined into a pdf file using <http://smallpdf.com/>

Juan Corrin, January 2015

Autumn 1999

① ③

Saturday 23rd October.

Pete and Jean into 1452 to carry on the excavations left by Pete & Big Steve a couple of weeks before.

Cleaved away the rubble hanging with the "chamber" and started to dig forward along the continuing passage. A corner can be seen ahead.

~~Saturday~~ Sunday 24th October

Took Penny's operated-a toe for a walk up to 1406 - Julie's cave. The boulder blocking the way down was removed within a minute and an hour's further digging made a descent "possible". More digging & possibly needed to drop 5m pitch.

Saturday 30th October

Returned to 1452 and opened up passage to allow a head-first look at the corner. Excellent echo but is going to be a long dig.

Also looked at 1454 - a sink in the road gutter 200m uphill of the second bend.

Drop goes down on the right. Needs excavating

MATIENZO CAVES PROJECT
