CASTER 2005

20/3/05

Penny, Juan, Jen, Terry, Ian. Walked up into the broken ground above site 271-274. Can across various holes: ① M4. Shaft - 15m in bottom of shakehole 1m diam. 30T 0453874 UTM 4797282 alt. 533m slight draft. ② M5. Shaft in shakehole - 2m diam - 6 plug at 4m deep. Possible way off. 30T 0453859. UTM 4797278 alt. 530m.

Jen found an adder. Then wandered up past 898 and down to walked depression ~~above~~ⁱⁿ the waterfall valley. Terry ~~to~~ walked back. Others walked east around Muela and up onto the summit to view Torca de Muela.

13-03-05 → 22-03-05 Torben, Peter, Bjarne, Jonas.

2167: Removed boulders from the surface. Because of lacking permits we used highest X-ray stuff to see it going 10m down to a rift blocked by a ^{small} calsite block, that needs power tools or bombs to be removed. Nice draft.

GPS: 0450057
4796648 (UTM WGS84)* ALT: 266m

VALLUNA, past Barney Rubble and the big chamber w. rock bridge. After sandy crowd until Traverse pitche (marked "p15"). The pitche was dropped through the hole ~~set~~ in the floor, at the traverse, p19. The pitche does not continue.

About 7m's down this passage goes of. Continues into p10, 6m below w. mud, but still continuing. Two ~~sp~~ survey legs made.

Cotresneda (#65): collected sediment samples for future DNA studies. The studies might give details on the prehistoric flora and fauna of the cave.

23/3/05 Belas Fuente las Varas. - A Neill, Corker.

Andy Pringle, Pete Jones, Dave Hoggarth, Dave Minor, private & public

2177 - GPS 0447783 - 4798652 - ~~Slow-worm Hole~~
Fenced depression alongside track - collapsed sandstone beds
NOT EXAMINED IN DETAIL

2178 - GPS 0447648 - 4798598 - Slow-worm Hole.
LARGE SHAKEHOLE IN BURNT AREA. DRAUGHTING HOLE, IN SANDSTONE
DUG AT TOP OF ^{SIDE} DEPRESSION. 3m DEEP, INTO SMALL CHAMBER,
ALL IN SANDSTONE. NO WAY ON FOUND

2179 - GPS 0447766 - 4798523 - BADGER HOLE
VERY LARGE DEPRESSION, IN CENTRE OF BURNT AREA, WITH SMALL
DRT WATERCOURSE. 2m HIGH RIFT ENTRANCE IN LIMESTONE.
TIGHT SQUEEZE DOWN TO ~~BE~~ SHORT FLAT OUT BEDDING, END IN
SMALL CHAMBER WITH MUD & BOULDER FLOOR.

2180 - GPS 0447595 - 4798468 - WELL DRESSING HOLE.
SMALL SPRING, WITH MAN-MADE WALL & WATER PIPE LEADING
OFF. NARROW RIFT IN SANDSTONE ALONGSIDE WALL, 2m
LONG, BECOMES TOO NARROW.

2181 - GPS 0447780 - 4798461
SMALL COLLAPSE ^{IN SANDSTONE} ON HILLSIDE ABOVE 2179. LIGHT DRAUGHT

2182 - GPS 0447783 - 4798498
DEPRESSION UNDER SMALL LIMESTONE SCAR, HALF WAY UP
HILL BETWEEN 2179 & 2181. NOTED, BUT NOT EXAMINED CLOSELY.

2183 - GPS 0447841 - 4798520 - WOODCUTTER'S CAVE
stream rising @ head of small valley (wooded) below
4m limestone cliff. stream splits immediately in entrance left hand

by steeping passage approx 65m around series to T junction
left 7m to dog leg which requires lump hammering to ongoing
passage. right tall rgt passable in liquid state not
passed.

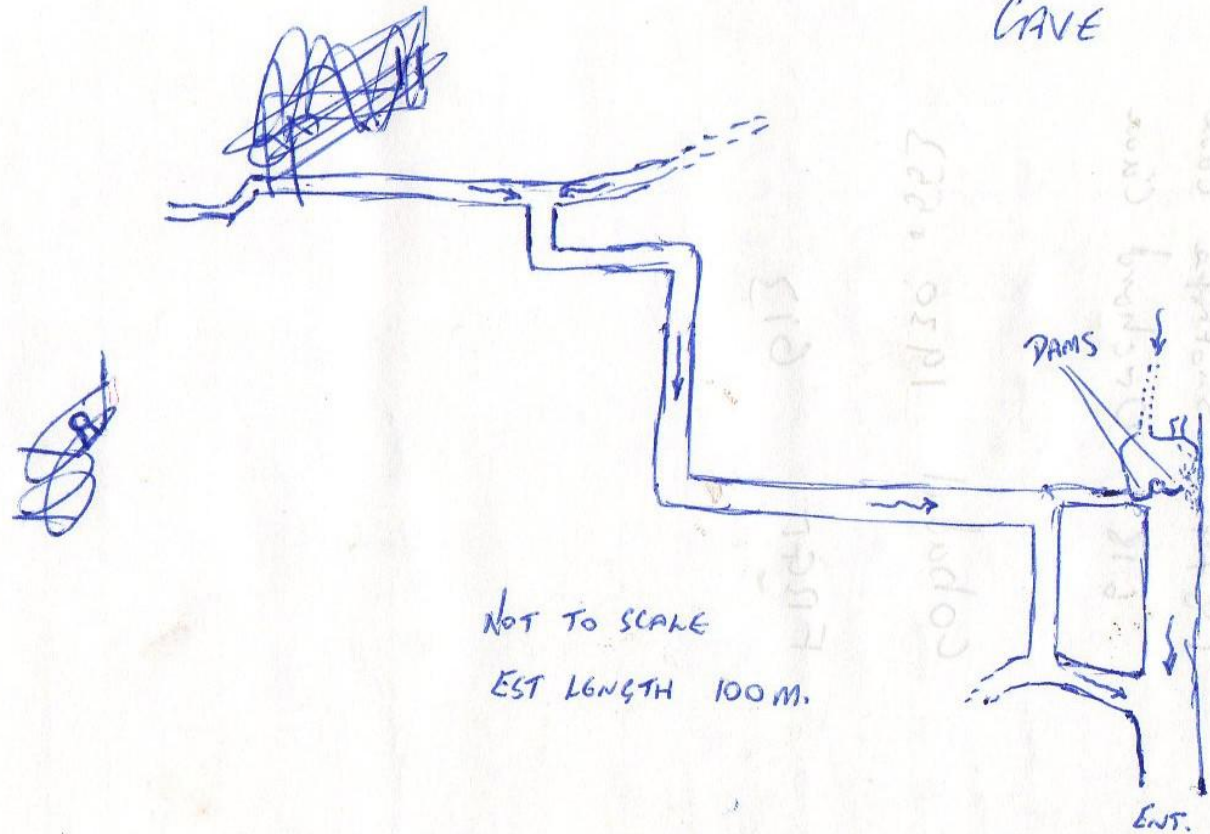

Right hand entrance series (approx 10m)
Walking leads to crawling round to the right, past
two dams. There are man made with water pipe.
Water flows in through narrow rft. This has strange
acoustics & could be enlarged.

2184 - STREAM SINK IN BOULDERS IMMEDIATELY OUTSIDE ENTRANCE
to 2183. 0447842 4798521

0448057 4798525

2185 GPS ~~0447841~~ - 4798520 Purple Horse-Trough RISING.
Small amount of water flows from cave. Cave has
a door past this walking sized passage quickly leads
to crawling. This required digging (moving cobbles) after
approx 10 meters this becomes wallowing in mud banks
to a right hand bend. The passage continues.

SITE 2183 WOODCUTTER'S CAVE

NOT TO SCALE
EST LENGTH 100 M.

24/3/08 Teams in La Gatuna.

Tom, Hilary, Jen, Penny - Equipo A.

- 2186 4m climb down in rift above track. Choked
- 2187 Deep shakehole, choked. Coal draught
- 2188 A lay depression with a hole in floor with slight draught possible dig.
- 2189 Open shaft at base of steep-sided shakehole. About 8m deep?
- 2190 A set of narrow shafts - were descended. Right hand is walk-down rift ~~under~~ to a narrow 5m pitch. Middle hole has a small pitch. Left hand slot is a 5m v/d pitch that appears blind.
- 2191 A limestone face above the track with a dig at the base.

25/3/05 Return to La Gatuna

Penny Hilary Ali Terry Steve M Juan - Equipo A
Phil + Torben - Equipo B → 2 pages on

Went back to last half of yesterday's walk. Found some more in the jungle of La Gatuna

- 001 2215 - Left hole in limestone to east of track where it bends + splits. Narrow 3m deep rift with cave above. Draught out. 2212 is to the R.
- 002 2216 - Complex of holes @ base of limestone lumps. Passage may continue.
- 003 2217 - Sandstone over limestone cave @ side of track. Slope drop about 5m and it may be possible to dig out the floor
- 004 2218 - Cave in N shalehole of 2. Needs vegetation removing to

enter.

005 - 394 Probably entrance to Collada. Entrance slit is covered with leaves + soil. Will need to be removed. Good draught started up while digging out.

006 - 2219 Dig in shakuhole with large sandstone slabs. (Near to 394). ~~Also~~ Can see down about 4m down in intersecting rifts.

~~007~~ 007 - 2220 Deep shakuhole has a choked cave at base and a rift choked at -4m on the side

008 - 2221 Large rift with limestone wall. Up to 8m deep but trees stop easy exploration.

009 - 2222 Flat out bedding goes in about 7m and turns R. Good draught may come from boulders in floor at end

24/03/05. LA GATUNA. Andy Pringle, Pete Jones, Jane Milner

25/03/05

1. 2229 Gps 01 Torven pic 2285

Small hole in wood very good draught out at 18 deg air temp. Dig

2. 2230 Gps 02 Torven pic 2287

Small hole below track, into small rift 1m deep, no draught, could dig, but poor site.

3. 2231 Gps 03 Torven pic 2288 and 2289

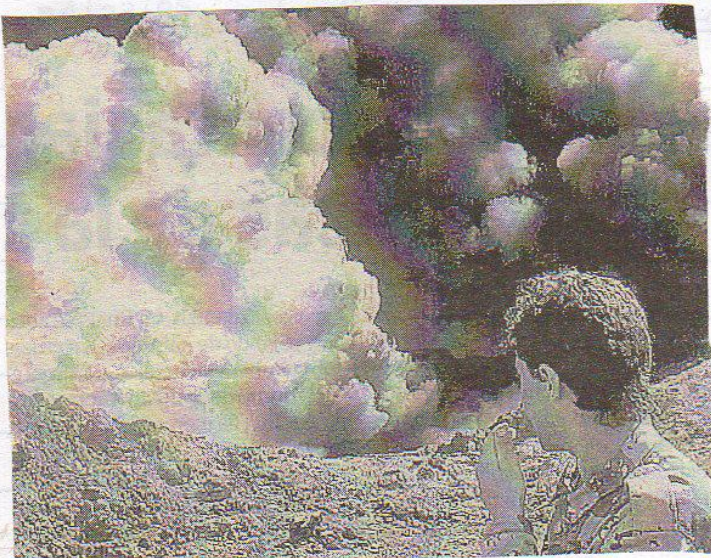

Rift above track low point as it goes to north from east of ruin barn. Possible dig below, but rift looks open with minimal work. Could not feel for draught as rift too open where we could get to.

Grupo de Emergencias de Espeleología para Cantabria

EFE SANTANDER

Cantabria podría disponer en abril de un grupo de atención de emergencias en espeleología, ya que la Dirección General de Protección Civil confía en adjudicar en el próximo mes este servicio a uno de los tres equipos que se han seleccionado para hacerse cargo de este operativo. El responsable de Protección Civil en Cantabria, Martín Vega, recordó a EFE que estos tres grupos han sido los elegidos por su departamento, a través de un procedimiento abreviado, tras quedar desierto el concurso que convocó Presidencia.

Vega explicó que los tres grupos están integrados por equipos expertos en la materia, uno de la federación cántabra de espeleología, otro de la federación nacional y un tercero compuesto por profesionales de este deporte y que han sido los que en años anteriores han trabajado en estas tareas.

Do you think Juan will notice this?

26/3/05 Cookie, Les W, Chris W, Tash

2244

Dragged the other three from turling around under a bolder to log a small draught hole that I found. Dig fever took over and soon the hole was large enough to feed Tash into it. Encouraging

Flag I E 168.4

27/3/05
10:30 start for Les, Phil, Pete, Ali + Juan with Tiano up onto S. Vega parking close to 1390, the 2 stream sinks dig. First taken to site 1219 where Tiano pointed out an unscented 50m pitch (covered with rocks) on the edge of the 'main' 9m deep hole.

Then a fairly energetic walk around the tops and down 100m and back up to the Les's Landrover with Tim in his slippers. He pointed out the known sites: 545, 490, 1191-2, 1875, 1584, 1216-17 and 1386 which were GPS'd and photographed.

Left Tians chasing off stray horses.

2232 → 002A & 003A on map below possibly new.
002A 5m shelf up/d 003A 4m deep - closed?

O12 is chisled "half tube"
behind Corvico, visible from
back. (2734)

Then had an hours R+R and off to La Grana - see 1 page on

28/03/05 Pringle, Pette Jones,raig Milner LA CATUNA AREA

(2235) 0449770 - 4800540

DRAUGHTING (SLIGHTLY) HOLE UNDER SLAB IN DEPRESSION IN PASTURE FIELD
AT '5 WAY' JUNCTION. SMALL CHAMBER UNDER FLOORING. BLOCK WITH 3
DESCENDING MUD/ROCK SLOPE TO DRAUGHTING HOLE - POSSIBLE TIP.

ABOVE GROUP JOINED BY WING COMMANDER & MARK WING.

(2236) 0449682 - 4800251

FENCED RIFT, 25'-30' DEEP IN DEPRESSION - NOT DISCLOSED.
(PHOTO'S PHIL PAPPARDY).

(2237) 0449971 - 4799550

OPEN HOLE, SLIGHT DRAUGHT, IN OLD FOREST TRACK - COVERED
BY LARGE SANDSTONE SLAB VERTICAL DESCENT TO TWO 6'6" Holes
(APPROX 6' DOWN) NOT DISCLOSED. EST DEPTH FROM THROWING
STONE APPROX 20'+

3. Gps 2 on Dave m gps = 2236

Pic 2a&b

Next but one shake hole to south from 2. Fenced rift some 10m deep can't feel draught but not good day.

see 2 pages on.
continues

27/3/04 La Gata Juan, Terry + Ray Andy P.

Went to fridge 2227 area and first looked at bedding planes above. Stuck video camera into RH hole previously excavated but appears choked. Really needs a hot day to ~~see~~ follow draught.

Fridge was also not draughting but managed to ^{get} be active part of the up-you-endscope dangling down the side of the grille to rotate around at the base of the 2m pot. There may be a rift going up at the back but again a draught is needed.

Moved onto holes ~~was~~ seen high up on E side of 5 way junction.

009 (2238) Under sandstone bed, 5m long cave which is a crawl to a small hole @ rear

010 (2239) ~~Under sandstone~~, A crawl on sand up under sandstone

011 (2240) ~~Under~~ A km pitch over a large block to a visible tight rift in limestone running across hole. u/d.

012 (2241) Resurgence in the small hamlet between the N end of La Gata and Riaco (called EL SUTO) Water resurges a thick sandstone bed. Crawl in for 4m continues uphill for at least another 8m.

2227 = Fridge ← better GPS for fridge
